Autobutler

Ruby on Rails, PostgreSQL, RSpec

Responsible for the online portal and application

- Implemented new features
 - Implemented a benefit system, allowing car owners to see the benefits they get from other companies by being part of Autobutler
- Maintained the current 'get an offer on insurance' solution.
- Behavior Driven Development

December 2013 – Marts 2014 – Developer

Playnation.eu

Java, MySQL

Part of a two-man team focused on developing an in-house version of GitHub

- Backend mostly done in Java
- Reverse engineering of GitHub

Education:

2015 – 2016: Bachelor of Software Development, Erhvervsakademi Lillebælt, Odense, Denmark, in parallel with working at Autobutler

2012 – 2015: Academy Profession Graduate in Computer Science, Erhvervsakademi Sjælland, Næstved, Denmark, in parallel with working at Autobutler and Playnation.eu, elective courses were Neural Networks, and Game Programming in Java

Programming Languages:

Java, Ruby, C#, JavaScript

Projects:

BoxTube (<http://www.anbora.dk/BoxTube>)

HTML, CSS, Bootstrap, AngularJS

A YouTube Jukebox app implemented with AngularJS

At parties, YouTube is often used as the sole music provider. People queue the video that they want to hear.

BoxTube is designed to simplify this scenario.

- Single page app
- Ajax search
- Playlist (upcoming videos only)
- Automatic play (as soon as the current video ends)
- Responsive design

Anras573.github.io (<http://www.anbora.dk/>)

HTML, CSS

My personal resume page.

For this page, I designed my own CSS framework, inspired by Bootstrap.

- Mobile first
- Responsive design

Certifications

Ruby Programming for Beginners

Udemy, License: UC-0BO4PW8E, March 2016, link: <http://ude.my/UC-0BO4PW8E>
