### **Programming Languages:**

C#, Ruby, JavaScript, Java, Delphi

### **Projects:**

#### **BoxTube (<http://www.anbora.dk/BoxTube>)**

*HTML, CSS, Bootstrap, AngularJS*

A YouTube Jukebox app implemented with AngularJS

At parties, YouTube is often used as the sole music provider. People queue the video that they want to hear.

BoxTube is designed to simplify this scenario.

- Single page app
- Ajax search
- Playlist (upcoming videos only)
- Automatic play (as soon as the current video ends)
- Responsive design

#### **Anras573.github.io (<http://www.anbora.dk/>)**

*HTML, CSS*

My personal resumé page.

- Bootstrap 4
- Pug

### **Certifications**

#### **Ruby Programming for Beginners**

**Udemy**, License: UC-0BO4PW8E, March 2016, link: <http://ude.my/UC-0BO4PW8E>
